Speed and clarity on the factory floor.

The Thinvent 15" Industrial Panel PC brings desktop-class performance to the places where work actually happens. With a 14th-generation Intel Core 5 processor and ten cores working together, it keeps up with demanding production software, dashboards and data logging without hesitation.

Why choose this panel PC

- Built for the shop floor, not the office. Its aluminium housing and fanless passive cooling mean there is no fan to clog with dust, so it keeps running in hot, gritty environments where ordinary computers struggle.
- See everything clearly. The 15 inch screen with 350 nits brightness and wide 178° viewing angles stays readable from almost any position, whether mounted at eye level or viewed from the side by a second operator.

- Connect to your existing equipment. Dual HDMI, VGA, four USB ports and Gigabit Ethernet make it straightforward to link with legacy machinery, barcode scanners and plant networks.
- Stay connected wirelessly. Dual band Wi-Fi 5 keeps your line-side terminals talking to the rest of your operation.
- Ready to work out of the box. Windows 11 Pro comes pre-installed, so you can deploy it straight onto the line.

Whether you are upgrading an ageing terminal or equipping a new production cell, this panel PC gives you the computing power and reliability your operation needs, day after day.
