Big performance for the factory floor.

Meet the Thinvent 15" Industrial Panel PC, a shop-floor workhorse built around Intel's 12th-generation Core i7-1255U. With 10 cores reaching up to 4.7 GHz and 12 MB of cache, it handles demanding industrial software without stutter, so your operators spend their time working rather than waiting.

Why teams choose it

- A bright 15-inch display with 350 nits and wide 178-degree viewing angles stays readable from almost any position on the line, cutting misreads and rework.
- Dual gigabit Ethernet ports let you keep control traffic and plant networks separate, a natural fit for SCADA, MES and machine-monitoring setups.

- The fanless aluminium housing means no vents to clog with dust and no moving parts to service, so it keeps running through long shifts in hot, grimy environments.
- An RS485 option connects directly to PLCs, drives and legacy equipment, while USB 3.2, HDMI and VGA cover modern peripherals and legacy displays alike.
- Windows 11 Pro comes ready to deploy, with the security and management tools IT teams already know.
- A wide-range 100 to 240 volt AC adapter with a 2 metre cable makes installation straightforward on most production floors.

If you need a panel PC that pairs serious computing power with the toughness of a sealed, passively cooled design, the Thinvent 15" is built for the job.
