Big Performance for the Factory Floor.

When your production line needs a reliable command centre, this 15 inch industrial panel PC delivers. Powered by a 12th generation Intel Core i7 processor with 10 cores, it handles demanding industrial software, live dashboards and multi-tasking without hesitation, so your operators are never left waiting.

Built for the realities of a working environment

- The fanless aluminium housing means no vents to clog with dust and no moving parts to wear out, keeping the unit running shift after shift.
- Dual gigabit Ethernet ports let you separate machine control traffic from your plant network, keeping critical processes steady and secure.

- The 178 degree viewing angle keeps readings clear from almost any position on the floor, while 350 nits of brightness holds up under bright factory lighting.
- With RS485 support, HDMI, VGA and USB 3.2 connectivity, it slots into existing control cabinets and connects to legacy equipment with ease.
- A 15 inch 1024 x 768 display gives you a generous canvas for SCADA, HMI and monitoring applications.

Ideal for production monitoring, machine control, kiosk terminals and shop floor data capture, this panel PC is ready to work as hard as you do. A keyboard and mouse set is included, so you can get set up straight away.

Choose the Thinvent 15 inch industrial panel PC and give your operation a workstation that keeps pace with your ambitions.
