Big performance for the factory floor.

The Thinvent® 15" Industrial Panel PC brings desktop-class speed to demanding industrial environments. Powered by an Intel® Core™ i7-1255U processor with 10 cores, it handles demanding applications, data logging and multi-window monitoring without slowing you down.

Built for the real world

- Runs reliably in dusty workshops and hot production areas thanks to its fanless passive cooling and aluminium housing.
- Keeps your lines moving with dual Gigabit Ethernet ports for separate control and office networks.
- Connects easily to legacy machinery and modern equipment alike, with HDMI, VGA, USB 3.2 and an optional RS485 port.

- Displays clearly from almost any position, with a 15" screen and wide 178° viewing angles.
- Comes ready to deploy with Windows 11 Professional pre-installed.

Why buy it

- One panel does the work of a PC and a monitor, saving space on crowded control desks.
- The i7-1255U gives you headroom for years of software updates and growing workloads.
- Aluminium construction and passive cooling mean fewer moving parts to service.
- Dual LAN and RS485 options make it a natural fit for SCADA, HMI and industrial automation setups.

If you need a tough, fast panel computer that keeps production running shift after shift, this is the one to choose.
