Power your workspace with a panel PC built to keep pace.

When your operation runs on tight margins and long shifts, your equipment should not slow you down. The Thinvent 15" Industrial Panel PC pairs an AMD Ryzen 5 7430U processor with a bright 15 inch display, giving you a responsive, capable workstation for the shop floor, the control room, or the front desk.

Why teams choose it

- The AMD Ryzen 5 7430U brings six cores and speeds up to 4.3 GHz, so everyday tasks, dashboards and line-of-business applications open quickly and stay responsive.
- A 15 inch panel with 1024 × 768 resolution and 350 nits brightness keeps information readable in real working conditions, with wide viewing angles so several people can see the screen at once.

- Fanless passive cooling in an aluminium housing means fewer moving parts to wear out and less maintenance to schedule.
- Gigabit Ethernet plus HDMI, VGA, USB and audio connections let you fit the panel into existing setups without extra adapters.
- Supplied with a Thinvent keyboard and mouse set, so you can be up and running straight away.
- No operating system preinstalled gives you the freedom to deploy the platform that suits your environment.

If you need a dependable industrial panel PC that handles daily workloads without fuss, the Thinvent 15" is a smart place to start.
