Big performance, small footprint: the Thinvent 15" Industrial Panel PC.

When your production line, kiosk or control room needs a screen that simply gets on with the job, this is the machine to reach for. Powered by an AMD Ryzen 5 7430U processor, it brings six cores of responsive performance to everything from shop floor dashboards to point of sale terminals, so your operators are never left waiting.

What it means for you

- Run demanding industrial software smoothly, from SCADA displays to inventory systems, without stutter or delay.
- See clearly from almost anywhere on the floor, thanks to a 15 inch screen with wide viewing angles and 350 nits of brightness that holds up under bright factory lighting.

- Keep your workspace clean and cable-light with a single panel-mounted unit that replaces a bulky box and monitor combination.
- Connect the equipment you already own, with HDMI, VGA, audio, four USB ports and gigabit Ethernet all on board.
- Set it up quickly with FreeDOS, ready for the operating system and software your business already runs.
- Depend on it shift after shift, with an aluminium housing and fanless passive cooling that copes with dust and heat far better than an office PC.

Whether you are equipping a new workcell or replacing ageing terminals on an existing line, the Thinvent 15" Industrial Panel PC delivers the reliability and speed your operation needs, at a price that makes sense.
