Speed and clarity on the factory floor.

The Thinvent 15" Industrial Panel PC brings desktop-class AMD Ryzen 5 performance right to the point of work. With six cores and speeds up to 4.3 GHz, it handles demanding applications, data logging and multi-tasking without hesitation, so your team spends less time waiting and more time producing.

Why choose this panel PC

- Built for the shop floor, not the office. The aluminium housing and fanless passive cooling mean there are no vents to clog and no fans to fail, so it keeps running in dusty, hot environments where ordinary computers struggle.
- See everything clearly. The 15 inch screen with 350 nits brightness and wide 178 degree viewing angles stays readable from almost any position, making it ideal for machine control, kiosks and production line dashboards.

- Connect to your existing systems. Dual band WiFi, Gigabit Ethernet, HDMI, VGA and a full set of USB ports make integration straightforward, whether you are linking to legacy equipment or modern networks.
- Ready to deploy. Windows 11 Pro comes pre-installed, so you can load your software and get running quickly.
- Reliable power. The included 12V adapter works with standard 100 to 240V supplies, giving you one less thing to worry about.

If you need a dependable, responsive panel computer that stands up to real industrial conditions, the Thinvent 15" is the practical choice.
