Power your shop floor with a panel PC that simply keeps going.

Built for the realities of industrial work, the Thinvent® 15" Industrial Panel PC brings desktop-class AMD Ryzen™ 5 performance to the place where the work actually happens. Whether that is a production line, a warehouse desk, a clinic reception or a service counter, this is a machine designed to be switched on in the morning and trusted all day.

Why teams choose it

- Keep working in dusty, hot or cramped environments. Fanless passive cooling and an aluminium housing mean fewer things to go wrong and nothing to clog up.
- See clearly from wherever you stand. The 15 inch screen with 350 nits brightness and 178° viewing angles stays readable from the side, so operators do not have to shuffle into position.

- Run the software you already rely on. Thinux™ Embedded Linux comes ready with Chromium and Firefox, RDP 10, SSH, VNC shadowing, Java and Python support, LibreOffice, a PDF viewer and multimedia playback.
- Connect to the systems around you. Gigabit Ethernet, dual band Wi-Fi 5, HDMI, VGA, audio, four USB ports and a 1 Gbps network link keep peripherals and remote sessions within easy reach.
- Get going straight out of the box. A keyboard and mouse set is included, and the 100 to 240 volt adapter works with the power you already have.

If you need a dependable, responsive panel PC that fits into real industrial workflows rather than fighting them, this is the one to specify.
