Power through every shift, on every line.

Meet the Thinvent® 15" Industrial Panel PC, built for the people who keep production moving. Whether you are running a shop floor terminal, a machine control station, a warehouse dashboard or a kiosk, this is the panel PC that simply gets on with the job.

Why teams choose it

- Responsive performance. The AMD Ryzen™ 5 7530U processor, with six cores reaching up to 4.5 GHz, keeps applications snappy and lets you run demanding dashboards without stutter.
- Built for the factory floor. The aluminium housing and fanless passive cooling mean no vents to clog and no fans to fail. It shrugs off dust and heat so your line keeps running.
- See it clearly, from anywhere. The 15 inch screen at 350 nits with 178 degree viewing angles stays readable from almost any position, ideal for shared workstations.
- Connect what you need. Dual band Wi-Fi 5, gigabit Ethernet, HDMI, VGA, four USB ports and audio in and out give you room for scanners, printers, cameras and legacy equipment.
- Ready from day one. Ubuntu Linux 24.04 LTS comes preinstalled, with a Thinvent® keyboard and mouse in the box. Unbox, mount, and start working.
- Dependable power. The included 12V 5A adapter runs from standard mains, so commissioning is quick and straightforward.

  If you need a rugged, responsive panel PC that fits into real industrial environments without fuss, the Thinvent® 15" Industrial Panel PC is the practical choice.
