Speed on the floor, clarity on the wall.

The Thinvent 15" Industrial Panel PC brings AMD Ryzen 5 7530U performance to the shop floor, the kiosk, the control room and the production line. Six cores and up to 4.5 GHz keep your dashboards, terminals and monitoring software responsive, while the 15 inch screen with 350 nits of brightness and 178 degree viewing angles stays readable from almost anywhere on the floor.

Why teams choose it

- One unit replaces a separate monitor and box PC, saving space where space is tight.
- Fanless passive cooling means fewer moving parts to service, so it keeps working through long shifts.
- Aluminium housing stands up to demanding industrial environments.

- Dual band Wi-Fi 5 and 1000 Mbps Ethernet keep you connected to plant networks and cloud systems.
- HDMI, VGA, four USB ports, speaker out and mic in cover displays, peripherals and audio.
- 12V DC input with a 2 metre cable simplifies installation on existing power setups.
- Ships without an operating system, so you load exactly the software your operation runs.

Ideal for production monitoring, machine control, point of sale, digital signage and building management. If you need a dependable panel PC that pairs serious processing power with a display built for real working conditions, the Thinvent 15" is built for the job.
