Big performance, compact panel, built for the shop floor.

Meet the Thinvent 15 inch Industrial Panel PC. At its heart sits an AMD Ryzen 5 7530U processor with six cores and speeds up to 4.5 GHz, so your line-side dashboards, machine interfaces and production apps stay responsive all shift long.

Why choose this panel PC

- Run demanding workloads without slowdown. Six cores and 16 MB of cache keep multitasking smooth, from MES terminals to quality inspection stations.
- See clearly from any position. The 15 inch screen with 178 degree viewing angles means operators get a readable view whether standing, seated or glancing from the side.
- Simplify your installation. A single 12 volt supply and standard HDMI, VGA and Ethernet connections make it straightforward to slot into existing control cabinets and workstations.

- Keep your software familiar. Windows 11 Pro comes ready, so your existing applications and IT policies carry straight over.
- Built for industrial environments. The aluminium housing and fanless passive cooling design suit dusty, hot production areas where ordinary office PCs struggle.

Typical uses

- Factory floor terminals and machine control panels
- Warehouse and logistics workstations
- Production monitoring and quality stations
- Kiosks and self-service points

If you need a dependable panel PC that handles real industrial work without fuss, the Thinvent 15 inch is the practical choice.
