Fast, responsive, and built for the factory floor: the Thinvent 15" Industrial Panel PC.

When your production line needs a reliable control terminal, this panel PC delivers. Powered by an AMD Ryzen 5 7530U processor with six cores and speeds up to 4.5 GHz, it handles demanding industrial applications without hesitation.

Why choose this panel PC

- Runs your critical software smoothly. The 7000 Series Ryzen 5 processor keeps SCADA, HMI, and MES applications responsive, so operators are never left waiting.
- Clear visibility from every angle. The 15 inch screen with 178 degree viewing angles and 350 nits brightness means your team can read it from across the machine or off to the side.
- Quiet, low maintenance operation. Fanless passive cooling means no fans to fail and less dust drawn into the enclosure, which suits dusty workshops.
- Built to last in tough environments. The aluminium housing stands up to industrial conditions, and the fanless design removes a common point of failure.
- Connects to your existing equipment. HDMI, VGA, dual USB 3.2 Gen 1, dual USB 2.0, gigabit Ethernet, speaker out, and mic in cover the connectivity most industrial setups need.
- Ready to deploy. Windows 11 Professional comes preinstalled, so you can load your applications and get running quickly.
- Flexible power. Runs from a 12 volt supply with the included adapter, and the input accepts standard mains voltages.

If you need a dependable panel PC for machine control, production monitoring, or shop floor data entry, the Thinvent 15" Industrial Panel PC is the practical choice.
