Small footprint, seriously big performance – the Neo R/4 keeps your business moving.

Think about everything a busy office, retail floor, or factory workstation throws at a computer. Dust, heat, cramped desks, and a never-ending list of tasks. The Thinvent Neo R/4 Mini PC is built to take it all in its stride, delivering the responsive, reliable power you need without hogging your valuable workspace.

This isn't just another compact computer. It's a quiet workhorse that slots neatly behind a monitor, under a counter, or inside a kiosk, freeing your desk from the clutter of a bulky tower. With the latest Intel Core processing inside, everyday tasks feel instant – from juggling spreadsheets and invoicing to running point-of-sale software and managing customer queries. It simply keeps up, so you can keep serving.

Reliability is at the heart of the Neo R/4. Housed in a tough, powder-coated steel chassis, it's engineered for continuous operation in demanding environments. It shrugs off the bumps and knocks of daily use, while the dual-band WiFi and gigabit Ethernet ensure your connections stay fast and stable, whether you're on the shop floor or in the back office.

It also speaks the language of business. The built-in serial port makes it a perfect alternative to ageing legacy systems, connecting effortlessly to receipt printers, barcode scanners, and industrial machinery. And with Windows 11 Professional pre-installed, you get a secure, familiar platform that's ready to join your network from the moment you switch it on.

Why choose the Thinvent Neo R/4? Because it's the simple, smart way to bring modern performance to any workspace – compact, dependable, and ready for whatever you throw at it.
