

## Thinvent Neo R/4 Mini PC

### Intel Core i5-12450H processor

8 core, up to 4.4 GHz, 12 MB cache

**16GB DDR4 RAM**

**128GB SSD**

**No WiFi**

**Ubuntu Linux**

SKU: R-I5\_12H-16-M128-12\_7-X-U-0

Power meets portability: the Thinvent Neo R/4 Mini PC.

Built for serious work without taking up serious space. Whether you are deploying kiosks, digital signage, or an edge computing station, this compact powerhouse delivers the punch you need from a 12th-generation Intel Core i5 processor. Multi-threaded tasks like data processing, web serving, or running a point-of-sale system feel effortless, while the eight cores handle multiple applications simultaneously without stuttering.

Out of the box it ships with Ubuntu Linux 24.04 LTS, so you enjoy a secure, stable, and highly customisable platform right away. No bloatware, no licensing headaches – just a clean environment for your software stack.

The all-steel, powder-coated chassis means this mini PC can sit in demanding environments, from factory floors to retail counters, and keep running reliably. Its compact footprint lets you mount it behind a monitor or tuck it away in a tight cabinet, freeing up valuable desk or floor space.

Storage and memory are solid for everyday business needs: a speedy 128GB SSD ensures quick boot times and snappy application loading, while 4GB of RAM keeps basic multitasking smooth. Need to connect peripherals? With dual USB 3.2 ports, Gigabit Ethernet, HDMI, and even a legacy VGA port, you have the flexibility to drive modern displays or older projectors without adapters.

Power efficiency is another win. The Neo R/4 draws low wattage and runs cool, so you save on energy bills and keep noise levels minimal. That makes it ideal for quiet offices, retail environments, or home workspaces.

Choose the Thinvent Neo R/4 when you need a dependable, compact, and Linux-ready computer that just gets the job done – day in, day out.
