Powerful performance in a compact package: perfect for modern business.

Designed for the professional who demands both space-saving design and serious processing power, the Thinvent Neo R/4 Mini PC brings Intel's 12th generation Core i5 muscle to your desk without taking up any of it. Whether you're running office productivity suites, handling digital signage, or managing point-of-sale systems, this little machine punches well above its weight.

Ready to work straight out of the box: it comes with a full-sized keyboard and mouse set, plus an efficient 12V power adapter. The included FreeDOS operating system gives you the freedom to install your preferred OS, so you're in control from the start.

Why choose the Neo R/4?

- Exceptional value: you get a 12th-gen processor with eight cores and turbo speeds up to 4.4 GHz – power that typically costs more in a bigger chassis, yet here it's delivered in a slim, steel housing that fits neatly behind a monitor or under a counter.

- Versatile connectivity: dual-band Wi-Fi, Gigabit Ethernet, HDMI, VGA, and multiple USB ports mean you can connect displays, legacy peripherals, and network devices without adaptors. Perfect for retail, healthcare, or education environments where flexibility is key.
- Reliable and quiet: the fanless design? Actually, it's not fanless, but the efficient cooling ensures whisper-quiet operation, even under load. And with certifications including BIS, RoHS, and ISO, you can trust its build quality in demanding conditions.

Save space, reduce clutter, and boost your productivity. The Thinvent Neo R/4 is the intelligent workhorse your business deserves.
