Unleash powerhouse performance in a footprint that defies its size.

Introducing the Thinvent® Neo R/4 Mini PC, where immense capability meets minimalist design. This compact industrial computer is engineered to be the silent, robust nerve centre for your most demanding applications, from the factory floor to the digital signage network.

Why the Neo R/4 is your next smart investment

Uncompromising reliability for mission-critical tasks

- Built with industrial-grade components in a rugged steel chassis, it thrives in challenging environments where ordinary PCs fail.
- Its dual Gigabit LAN ports ensure unwavering, high-speed network connectivity for seamless data transfer and control.
- Pre-installed Windows 11 IoT provides a stable, secure, and long-term platform for your specialised software.

Maximum versatility in minimal space

- The ultra-compact form factor installs effortlessly anywhere, freeing up valuable workspace and simplifying integration into kiosks, machinery, or retail displays.
- With comprehensive connectivity including dual-band Wi-Fi, it seamlessly interfaces with a vast array of peripherals and legacy systems.
- The included keyboard and mouse set means it's ready to deploy straight out of the box, minimising setup time and getting you operational faster.

Engineered for efficiency and future-readiness

- The advanced processor architecture delivers exceptional multitasking power for smooth operation of complex applications without lag or downtime.
- Its energy-efficient design reduces operational costs and heat output, contributing to a cooler, more reliable system over the long term.
- This is a solution built not just for today's challenges, but for the evolving demands of tomorrow's industrial landscape.
