Unleash robust computing power in a remarkably compact form.

Engineered for demanding environments

The Thinvent® Neo R/4 Mini PC is built to deliver unwavering performance where it matters most. Its industrial-grade steel housing ensures steadfast reliability in settings where standard office computers simply can't cope. Experience the seamless operation required for critical automation and control tasks without the bulk of a traditional tower.

Ideal for industrial applications

This versatile unit is the perfect core for a wide range of specialised systems. Its dual Gigabit LAN ports and legacy serial connection provide essential connectivity for machine interfacing and network management.

- Drive digital signage and kiosks with flawless, 24/7 operation.

- Form the reliable heart of automation panels and PLC systems.
- Manage network appliances and thin client setups with absolute dependability.
- Process data at the edge for IoT gateways with silent, fanless efficiency.

Simplify integration, maximise uptime

Forget about unnecessary extras and software bloat. Supplied with FreeDOS, the Neo R/4 offers a clean, stable foundation, allowing you to install only the dedicated software your project requires. Its compact, VESA-mountable design and wide-range power input make installation and deployment straightforward in virtually any location. Choose the industrial-grade computing solution that focuses purely on performance and resilience.
