Powerful performance in a compact, rugged design for industrial applications.

Unleash seamless productivity

The Neo R/4 Mini PC brings the speed and efficiency of a modern AMD Ryzen processor to your workspace. Whether you're powering digital signage, running a point-of-sale system, or managing a thin client setup, this machine handles multitasking with ease. Its embedded Thinix operating system boots quickly and runs reliably day in, day out, without the bloatware of consumer operating systems.

Built for demanding environments

Housed in a powder-coated steel chassis, this mini PC withstands the bumps and vibrations of shop floors, kiosks, and factory lines. The compact footprint saves valuable desk or rack space, while the wide operating temperature range ensures consistent performance in temperatures from 0 to 40 degrees Celsius. You get industrial-grade durability without sacrificing computing power.

Designed for remote management and security

Out of the box, the Neo R/4 supports RDP, VNC shadowing, and SSH for secure remote display and control. Browser-based management tools let you update, monitor, and troubleshoot from anywhere. With Java, Python, and glibc support, your custom applications run natively. And because it runs Thinix Embedded Linux, you enjoy a locked-down environment that minimises attack surfaces and reduces IT overhead.

The smart choice for modern business

No WiFi means no security risks from wireless networks – perfect for cabled, high-security environments. The inclusion of both HDMI and VGA ports gives you flexible display options, while the USB 3.2 and Gigabit Ethernet deliver fast data transfers and network throughput. Energy efficient and backed by BIS, RoHS, and ISO certifications, the Neo R/4 is the reliable workhorse your operations deserve.
