Compact power, boundless potential.

Unleash reliable performance for your demanding industrial workspace with the Thinvent Neo R/4 Mini PC. Powered by a high-efficiency AMD processor, this compact machine handles multitasking, data logging, and light automation control without breaking a sweat. Its small footprint means it slips neatly into tight kiosks, digital signage enclosures, or factory bench setups, freeing up valuable desk space.

Why choose the Neo R/4? Because you need a system that just works, day in and day out. With durable steel construction and a powder-coated finish, it shrugs off the bumps and vibrations of an active environment. The included Windows 11 IoT Enterprise LTSC ensures a stable, long-term platform that receives only essential security updates – perfect for mission-critical applications where downtime is not an option.

Connectivity is straightforward and practical. Dual-band Wi-Fi keeps you wirelessly linked to your network, while gigabit Ethernet offers a rock-solid wired option. Two USB 3.2 Gen 1 ports handle high-speed data transfers, and legacy USB 2.0 ports connect older peripherals without fuss. The built-in HDMI and VGA outputs let you drive two displays simultaneously, ideal for monitoring dashboards or point-of-information screens.

Forget fiddling with separate add-ons: every Neo R/4 ships with a matching Thinvent keyboard and mouse, so you're ready to deploy from the moment you open the box. The 12V DC power supply sips energy quietly, keeping your electricity costs low and your operation green.

Whether you're upgrading a production line, refreshing a public display, or building a reliable thin client, the Thinvent Neo R/4 Mini PC delivers dependable, space-saving performance at a sensible price. It's the workhorse your business deserves.
