Big performance, small footprint.

Meet the Thinvent® Neo R/4 Mini PC, a compact desktop built around the AMD Ryzen™ 5 7530U processor. With six cores and speeds up to 4.5 GHz, it handles everyday business workloads with ease, from billing counters and point of sale terminals to office desktops and information kiosks.

Why choose the Neo R/4

- Responsive everyday performance. The AMD Ryzen™ 5 7530U keeps applications, browsers and spreadsheets moving smoothly, so your team spends less time waiting and more time working.
- Ready for long-term deployment. Windows 11 IoT Enterprise LTSC 2024 Value gives you a stable, consistent platform that suits organisations wanting predictable, long-life systems rather than constant change.

- Flexible connectivity. Dual band Wi-Fi 5 and Gigabit Ethernet keep you connected, while HDMI, VGA, USB and audio ports make it simple to attach the monitors, peripherals and speakers you already own.
- Built for the workplace. A powder coated steel housing in a compact mini PC format fits neatly on a desk, counter or shelf, and the 12V adapter keeps setup straightforward.
- Peace of mind. BIS, RoHS and ISO certifications reflect a product designed and manufactured to recognised standards.

Whether you are equipping a retail chain, a back office or a single workstation, the Thinvent® Neo R/4 delivers dependable computing in a tidy package.
