Big performance, tiny footprint – the Treo Mini PC that means business.

Built for the modern workspace, the Thinvent Treo Mini PC delivers dependable desktop-class power without the bulky tower. Whether you're managing a busy front desk, powering digital signage, or equipping a hot-desk environment, the Treo slips quietly into any setup and gets on with the job – no fuss, no fanfare, just solid, responsive performance.

Engineered to keep its cool under pressure. The Treo's solid aluminium chassis isn't just handsome – it works hard to draw heat away from the processor, so the system stays stable even during long shifts. That robust metal build means it shrugs off the knocks and bumps of everyday use, while the smooth, powder-coated finish looks professional on any desk or tucked behind a display.

Made in India, ready for the world. Every Treo is designed and built in India, reflecting a commitment to quality craftsmanship and dependable supply. If you're kitting out an office, a retail chain, or a large rollout, Thinvent can tailor colours and design to match your brand or operational needs – just ask about large-quantity customisation.

Simple to deploy, simple to love. With multiple USB ports, wired gigabit networking, and support for both HDMI and VGA displays, the Treo plays nicely with the monitors, keyboards, and peripherals you already own. It comes pre-loaded with Windows 11 Professional, so your team can start working within minutes of unboxing.

Choose the Treo for a compact, capable, and genuinely built-to-last mini PC that keeps your workspace tidy and your productivity high.
