Small size, serious performance – the Treo Mini PC puts desktop-class power exactly where you need it.

Whether you're kitting out a home office, a reception desk, a laboratory or a retail counter, the Treo slips into the tightest spaces and gets on with the job. With its 12th-generation Intel Core i5 processor and 12 cores, it handles demanding spreadsheets, busy web apps, video conferencing and even light creative work – all without the bulk and noise of a traditional tower. You'll notice the difference the moment you open your tenth browser tab or switch between applications at speed.

Why it makes sense for your workspace

- Mount it discreetly behind a monitor with the included VESA bracket and reclaim your desk
- Connect two displays and stream content over fast dual-band Wi-Fi – no cable clutter
- Arrives ready to work with Windows 11 Professional, plus a matching keyboard and mouse

- Power-efficient 12V design keeps running costs low and stays cool hour after hour

Built to work, built to last

The Treo's solid aluminium housing isn't just for looks. It acts as a heat sink, drawing warmth away from the components so the system keeps its composure even on a warm afternoon. The powder-coated black finish resists scuffs, while the smooth metal shell shrugs off the bumps of a busy working day. This is a machine that looks professional on your desk and stays professional under pressure.

And because Thinvent designs and makes the Treo in India, you can rely on build quality that's accountable from the drawing board to your doorstep.

Need a consistent fleet across multiple sites? We can tailor colours and designs to your brand when you order in volume. So whether you're deploying twenty units or two thousand, the Treo Mini PC is the smart, sturdy, space-saving choice.
