## Performance that works as hard as you do: the Thinvent Treo Mini PC

Nothing slows a project down quite like an underpowered machine. With the Intel Core i5-12450H processor at its heart, the Thinvent Treo Mini PC powers through demanding multitasking and business-critical applications without breaking a sweat. Whether you're running CRM software, managing financial spreadsheets, or developing code, its responsive 8-core performance handles everything you throw at it.

This is no generic white-label box. Each unit is one hundred percent designed and made in India, crafted from solid aluminium for superior heat dissipation and a finish that looks every bit as premium as it feels. The sleek, powder-coated body means zero chassis flex and whisper-quiet operation—perfect for an office environment or a compact workshop workstation. And if you've got taste for something beyond basic black, we'll colour-match and customise the design to your brand or interior, especially for larger deployments.

For IT managers looking for a consistent rollout, the Treo Mini PC is simplicity itself. Pre-loaded without an operating system gives you the freedom to deploy your preferred environment, while the included Thinvent keyboard and mouse bundle means you're up and running out of the box.

Compact, durable, India-made reliability that outpaces the competition. Choose the Thinvent Treo and leave computing frustrations behind.
