Unleash compact power with a mini PC built to perform.

Engineered for dependability

- Solid aluminium chassis with a powder-coated black finish acts as a natural heatsink, keeping the Core i5 processor cool even under sustained loads
- No noisy fans to wear out – the passive-cooled design means whisper-quiet operation in any office, retail floor, or classroom
- Robust metal construction and smooth finish resist dust, knocks, and everyday wear, giving you years of trouble-free service
- 100% designed and made in India, backed by Thinvent's reputation for industrial-grade reliability

Perfect for demanding environments

- Tackle multitasking, data entry, or digital signage with a modern 8-core processor that handles productivity software and media playback without lag
- Dual-band Wi-Fi keeps you connected without messy cables, while gigabit Ethernet gives you a stable link for critical applications

- Plenty of USB ports for scanners, printers, and peripherals – ideal for point-of-sale kiosks, reception desks, or manufacturing workstations
- VESA mount included so you can tuck the PC behind a monitor or under a counter, saving desk space and reducing clutter

Built for you

- Comes complete with a Thinvent keyboard and mouse – everything you need to get started immediately
- For larger deployments, we offer customisable colours and front-panel designs to match your brand or workspace aesthetic
- FreeDOS pre-installed gives you the freedom to load your preferred operating system without paying for a licence you don't need

Your next project deserves a mini PC that's as reliable as it is compact. Choose the Thinvent Treo – the workhorse that packs a punch without taking up room.
