Power and purpose, perfectly packaged.

100% designed and made in India: the Thinvent Treo Mini PC brings performance you can depend on, in a form that fits anywhere.

Why choose the Treo?

It is built for real work. The AMD Ryzen 5 processor delivers smooth multitasking and responsive computing, whether you are running a digital signage display, powering a kiosk, managing a thin client setup, or automating an industrial controller. No lag, no fuss.

The solid aluminium chassis is not just for looks – it acts as a heatsink, keeping the system cool and stable even under continuous load. The smooth, powder-coated finish resists wear and tear, so your investment stays professional for years.

Because the Treo is a mini PC, it vanishes into your workspace. Mount it behind a monitor with the included VESA bracket, tuck it under a desk, or let it sit unobtrusively on a shelf. It takes up minimal space but delivers maximum utility.

With a wired keyboard and mouse included, and Ubuntu Linux 24.04 LTS pre-installed, you are ready to go straight out of the box – no licence costs, no bloatware, just a clean, stable platform.

Better yet, if you have a large requirement, the Treo can be customised. Choose your own colour and design to match your brand or environment. That is the advantage of working with a manufacturer that designs and builds locally.

Reliable, secure, and built to last – the Thinvent Treo Mini PC is the workhorse your business needs.
