Power meets precision, purpose-built for relentless performance.

Designed for the modern workplace

Entirely conceived and crafted in India, this powerhouse brings AMD Ryzen processing to your most demanding tasks. The solid aluminium chassis isn't just about a sleek, smooth finish – it actively draws heat away from the core components, keeping your system cool and stable even during sustained workloads. That means fewer slowdowns and a machine that works as hard as you do.

The compact form factor is a space-saving hero, mounting effortlessly behind a monitor or tucking into a tight corner. It turns any display into a robust, silent workstation. Whether you're running a busy reception desk, powering a digital signage network, or managing a point-of-sale system, this Mini PC handles the load without a fuss.

For businesses with specific needs, flexibility is key. Need a custom colour or a different layout for a large-scale deployment? We can tailor the design to match your brand or environment perfectly. The included Windows 11 IoT Enterprise LTSC 2024 Value edition provides a stable, long-term platform, so you spend less time on updates and more time on productivity.

Choose a computer that's built to endure, beautifully engineered, and ready for what's next. It's not just a Mini PC – it's a long-term investment in reliability and performance.
