Engineered for the real world, refined for the impossible.

Performance without compromise

- Power through demanding industrial applications with the responsive AMD Ryzen™ 5 7430U processor, effortlessly handling data logging, edge analytics, and HMI tasks with six cores ready for simultaneous workloads.
- 4GB DDR4 memory and a fast 128GB SSD mean your applications launch quickly and systems stay responsive, even in multi-tasking environments that would stall lesser machines.

Built to thrive anywhere

- The all-aluminium body isn't just handsome – it acts as a passive heatsink, wicking away heat so the Treo stays reliable in tight cabinets, factory floors, or even outdoor kiosks where temperatures fluctuate.

- Dual-band Wi-Fi and gigabit Ethernet give you networking flexibility, whether you're running a standalone system or integrating into a larger IoT ecosystem.

Made for your mission, not someone else's catalogue

- 100% designed and manufactured in India, so you get local support, faster lead times, and confidence in supply chain resilience.
- Need a specific colour or a tweaked front panel? For larger quantities we can customise the finish and design to match your brand or deployment environment – no off-the-shelf compromises.

The Thinvent Treo Mini PC: where robust engineering meets practical performance, ready for the next shift.
