Powerfully compact, proudly Indian — the Thinvent Treo Mini PC delivers desktop-class performance in a sleek, space-saving aluminium chassis.

Imagine a computer that fits in the palm of your hand yet handles everything from busy office workflows to dynamic digital signage. That is the Treo. Built around the robust AMD Ryzen 5 7430U processor, this mini PC gives you smooth multitasking, reliable application performance, and the efficiency to run Windows 11 Pro without compromise. Whether you are managing spreadsheets, controlling a kiosk, or powering a conference room display, the Treo keeps you productive.

But what truly sets it apart is its construction. Every unit is 100% designed and made in India, using solid aluminium with a sophisticated black powder-coated finish. This metal body isn't just for looks — it dissipates heat effectively, keeping the system cool and stable even during sustained use. The result is a mini PC that feels as premium as it works.

For businesses with larger deployments, we can tailor the look to your brand. Custom colours and design finishes are available, turning a functional workstation into a cohesive part of your environment. Need a specific colour for retail spaces or a unique front panel for your equipment rack? We can help.

The Treo comes ready to use with a Thinvent keyboard and mouse, plus VESA mount support — so you can tuck it behind a monitor or mount it on a wall. And with no built-in WiFi, you gain extra network security and reliability by using a wired Ethernet connection.

Choose the Thinvent Treo Mini PC when you need robust, silent, space-saving computing with the confidence of Indian engineering and a build quality that lasts.
