Unleash remarkable performance in a powerhouse that fits in the palm of your hand.

Designed and manufactured entirely in India, this Mini PC is your steadfast partner for demanding industrial and commercial environments. Its solid aluminium chassis, finished in sleek black, acts as a natural heatsink, silently drawing heat away from the AMD Ryzen processor so you can rely on rock-steady, high-speed computing around the clock.

Forget clunky towers cluttering your workspace. This compact marvel slides effortlessly behind a monitor or tucks neatly into a tight control cabinet, turning any display into a capable workstation. The pre-installed Thinux Embedded Linux environment is ready to go right out of the box. Open Chromium or Firefox, connect to remote servers via RDP 10, Putty or VNC, and run your critical applications – whether they are written in Java, Python or rely on glibc – without a second thought.

Need to edit documents, view PDFs, play media or manage a video conferencing session? The Treo handles it all with quiet efficiency. With dual-band WiFi and gigabit Ethernet, you stay connected to your network and the world. And if you have a larger deployment, you are not stuck with a standard look – we can customise colours and design to match your brand or application perfectly.

Make the smart, reliable choice for embedded systems, digital signage, thin client deployments or industrial control. The Treo Mini PC delivers a no-compromise experience in a beautifully engineered, Indian-made package.
