Powerful performance, proudly made in India.

Built for the real world, not the spec sheet

The Thinvent Treo Mini PC brings serious processing muscle to your workspace without taking up any of it. Powered by an AMD Ryzen 5 7000 Series processor, this compact machine handles everything from office productivity to digital signage, point-of-sale systems, and light content creation. You get smooth multitasking and responsive performance, whether you're managing spreadsheets, running inventory software, or driving a presentation on two screens at once.

Designed to work as hard as you do

Every Treo is 100% designed and made in India, with a solid aluminium chassis that doubles as a heat sink. The powder-coated black finish isn't just smart-looking – it actively helps keep your computer cool and reliable, even in demanding environments. And because it's a solid metal build with a smooth finish, this mini PC feels premium and stands up to daily wear and tear.

No frills, just focus

This configuration includes Windows 11 Pro and deliberately omits WiFi – perfect for secure wired networks, retail counters, or industrial settings where connectivity needs to be locked down. You get two USB 3.2 ports, two USB 2.0 ports, and four front-facing USB 2.0 ports, plus HDMI and VGA for legacy displays. It's the ideal replacement for an ageing desktop that needs a silent, space-saving upgrade.

Customisable to your needs

Need a specific colour or design for a large deployment? We can tailor the look of your Treo to match your brand or environment. That's the Thinvent promise: Indian engineering, built around you.
