Compact power, crafted for the rigours of industry.

Why the Thinvent Treo Mini PC deserves a place in your setup

- It's the perfect blend of performance and durability, purpose-built for industrial environments where reliability is non-negotiable.
- The AMD Ryzen™ 5 7430U processor brings six efficient cores that handle multitasking, data processing, and edge computing with ease – without consuming unnecessary energy or space.
- Its solid aluminium chassis isn't just about looks. The black powder-coated finish acts as a natural heat sink, keeping the system cool and stable even under continuous load. No noisy fans working overtime.
- At just 199.5mm by 181.5mm by 29.5mm, this mini PC fits neatly behind a monitor, on a shelf, or mounted via VESA – freeing up valuable desk or floor space.
- Dual-band Wi-Fi and a gigabit Ethernet port give you flexible networking options, whether you're connecting to a wired industrial network or a wireless office environment.

- With 4GB of DDR4 RAM and a 128GB SSD, it boots quickly and runs essential applications smoothly – ideal for digital signage, kiosks, light control systems, or office workstations.

What truly sets this Treo apart

- It is 100% designed and made in India, supporting local manufacturing and strict quality standards.
- Need something unique? For larger requirements, we can customise the colour and design to match your brand or specific environment.
- The aluminium body and smooth finish resist dust, corrosion, and daily knocks – built to last where plastic cases would crack or overheat.

Choose the Thinvent Treo Mini PC when you want a compact, reliable workhorse that handles the heat and keeps delivering, day in and day out.
