Power where you need it, reliability when it matters.

The Thinvent Uno 21.5" All-in-One PC is built for the modern workplace where desk space is at a premium. By combining a slim, height-adjustable display with genuine Intel Core i5 performance, it cuts cable clutter and delivers the power to handle everything from business dashboards to financial data entry. Free from a traditional tower, this machine lets you reclaim your desk and create a cleaner, more professional front-of-house or control room environment.

Choose the Thinvent Uno because it is uniquely suited to factory floors, back-office shifting changes, or anywhere multiple operators share a station. The foot print is compact and with a flick of the wrist you can lift, lower, and tilt to find the perfect viewing angle. Plus, everyone from warehouse supervisor to production line manager will enjoy snappy multitasking and swift application loading, all while unified behind one elegant screen.

Commercial cost is centre stage here, too. This integrated unit halves the number of power leads your admin footfall has to trip over and requires minimal servicing clearance. It simplifies hot-desking rotas, as each user simply adjusts the height to suit. Finished to ISO quality standards, the chassis manages performance thermals efficiently so your GPU-heavy charts and spreadsheets remain intelligible even under a brilliant WUXGA touch enabled I trust not—but a generous IPS display delivering clear, industry-grade day-to-seen visuals.

Make the shift to the connected, clutter-free agency of a machine that finishes its job before yours does. The Thinvent Uno Two-One-Five ticks the computing reliability checkbox so you focus entirely on the workstation outputs. Save user tuition costs while sharing one simple, built to last and adapt canvas for all enterprise interactions.
