A workspace that keeps pace with your busiest days.

The Thinvent Uno 21.5" All in One brings order and speed to any front desk, back office or studio bench. One slim unit replaces the tangle of a separate tower, monitor and speakers, so your team gets a tidy, dependable workstation from day one.

Why teams choose the Uno

- Built for real work: the 13th generation Intel Core i5 processor with ten cores responds quickly to spreadsheets, billing software, design tools and video calls, even with several apps open at once.
- Clear, comfortable viewing: the 21.5 inch full HD screen stays crisp and readable from wide angles, so colleagues gathered round a counter or desk all see the same thing.
- Ready for business software: Windows 11 Professional comes preloaded, giving you the management and security tools growing organisations depend on.
- Neat, adjustable setup: the height adjustable stand lets each user find a comfortable viewing position, reducing strain across long shifts.
- Room for your peripherals: plenty of USB ports, HDMI, VGA, audio connections and wired networking mean barcode scanners, printers, card readers and second screens connect without adapters.
- Reliable connectivity: dual band Wi-Fi keeps cloud apps and messaging running smoothly.
- Privacy when you need it: the pop-up camera stays out of sight until you actually want to be seen.
- Practical security: a Kensington lock point lets you secure the unit in shared or public-facing spaces.
- Solid, smart construction: an aluminium alloy and steel housing in a professional black finish looks the part and stands up to daily handling.

If you want a single, well-equipped machine that simplifies procurement and keeps your team productive, the Thinvent Uno is the sensible choice.
