Meet the Thinvent Uno 21.5 – where power meets purpose.

This all-in-one PC is built for professionals who demand clean aesthetics and dependable performance, without sacrificing desk space or security. The AMD Ryzen 5 processor gives you smooth multitasking for office applications, data entry, customer-facing kiosks, and point-of-sale systems. Whether you're managing a reception desk, a classroom, or a retail counter, the Uno delivers the responsiveness you need, day in and day out.

A 21.5-inch full HD display with wide viewing angles ensures everyone sees the screen clearly, while the pop-up camera keeps video calls private until you need it. With Windows 11 Pro pre-installed, you benefit from enterprise-grade security and seamless management in networked environments.

Why choose the Thinvent Uno over a standard desktop and monitor?

- It saves space – one clean unit replaces a tower, cables, and a separate screen.
- It's built to last – an aluminium alloy and steel housing stands up to continuous use.
- It runs cool and quiet – the efficient 12V power supply keeps energy costs low.
- It connects reliably – Gigabit Ethernet keeps your wired network fast and stable.

The fixed stand gives a solid, professional posture on any counter or desk. And with ample USB ports and both HDMI and VGA outputs, you can extend your workspace or connect legacy peripherals without fuss.

The Thinvent Uno 21.5: a straightforward, powerful tool for the places where work gets done.
