Power meets elegance – the Thinvent Uno redefines your workspace.

The ideal desktop for professionals who value both performance and simplicity

Say goodbye to tangled cables and bulky towers. The Uno 21.5 combines a sleek, aluminium-alloy chassis with a height-adjustable stand, so you can create an ergonomic setup that suits you perfectly – whether you're coding, managing data, or running a busy checkout desk.

Built around the AMD Ryzen 5 7430U processor, this all-in-one handles multitasking with ease. Open multiple browser tabs, run productivity software, or compile code without missing a beat. The crisp 1080p display delivers sharp visuals and wide viewing angles, making collaboration and presentations effortless.

Security and privacy are front-of-mind. A pop-up 2MP camera retracts when not in use, and the Kensington lock gives you peace of mind in shared or public spaces.

Running Ubuntu Linux 24.04 LTS, the Uno is ready out of the box for developers, educators, and businesses that rely on open-source software. No bloatware, no unwanted subscriptions – just a stable, secure environment you can customise to your needs.

- Space-saving design with a single power cable
- Smooth, responsive performance for day-to-day tasks
- 128GB SSD for fast boot times and quick app loading
- Built-in speakers, Ethernet, and full HDMI/VGA connectivity

Whether you're upgrading a school computer lab, fitting out a medical reception, or kitting out a hot-desking zone, the Thinvent Uno delivers reliable, professional computing in a footprint that leaves your desk free for what matters.
