Big screen productivity, built to stay on shift after shift.

Meet the Thinvent Uno 21.5" All in One PC, a workspace workhorse designed for businesses that need dependable computing without the clutter. Powered by an AMD Ryzen 5 7530U processor, it handles everyday workloads with ease, from point of sale and billing counters to reception desks, kiosks and back office stations.

Why it earns its place

- A 21.5 inch full high definition display gives staff and customers a clear, comfortable view from almost any angle, so information is easy to read at a glance.
- The height adjustable stand lets each user set the screen where it suits them, reducing strain across long shifts.
- An all in one form factor means fewer cables, less desk clutter and a tidier, more professional front of house.

- Windows 11 IoT Enterprise LTSC 2024 Value keeps the platform stable and familiar, so teams spend time on work rather than on updates and interruptions.
- Wired gigabit Ethernet and no WiFi suit controlled environments where a stable, cabled connection matters more than wireless convenience.
- A pop up camera keeps video calls ready when needed and out of sight when not.
- Built in speakers, generous USB connectivity and both HDMI and VGA outputs make it simple to connect peripherals, secondary displays and audio.
- An aluminium alloy and steel housing with a Kensington lock stands up to busy public facing locations.

If you want a reliable, low fuss machine that looks after your team and your budget, the Thinvent Uno is the sensible choice.
