Big screen productivity, ready for your software.

The Thinvent Uno 21.5" All in One PC brings a generous full high definition display and responsive AMD Ryzen 5 performance together in one tidy, desk friendly machine. It is built for people who want a dependable workhorse without the clutter of a separate tower, monitor and cable spaghetti.

Why it earns its place on your desk

- The 21.5 inch screen with wide viewing angles keeps documents, dashboards and spreadsheets clear from almost any seat in the room.
- The 6 core AMD Ryzen 5 7530U processor with up to 4.5 GHz and 16 MB cache keeps everyday multitasking, browsing and office applications feeling quick and fluid.
- With no operating system preinstalled, you choose the platform that suits your workflow, whether that is a familiar desktop environment or a purpose built setup.
- A pop up 2 megapixel camera stays tucked away when not in use, giving you video calls when you need them and privacy when you do not.
- Dual 3 watt speakers, a mic input and a speaker out make it ready for calls, presentations and media without extra peripherals.
- Gigabit Ethernet keeps your connection wired and steady in offices, labs, retail counters and back office desks.
- A Kensington lock point helps you secure the unit in shared or public facing spaces.
- The fixed stand and all in one form factor free up desk space and simplify setup, so you can be working within minutes of unboxing.

If you want a clean, capable and uncomplicated computer for your business, the Thinvent Uno is the sensible choice.
