Big screen productivity, ready for your software.

The Thinvent Uno 21.5" All in One PC is built for organisations that want a clean, capable workstation without the clutter of a separate tower and monitor. With AMD Ryzen 5 processing power at its heart, it handles everyday business software, billing counters, front-desk terminals, and back-office tasks with ease.

Why choose the Uno

- One tidy unit instead of a tower, monitor, and cables. It frees up desk space and simplifies setup across many seats.
- The 21.5 inch full HD screen with wide viewing angles stays clear whether you are sitting square on or glancing from the side, which suits shared counters and reception desks.
- A pop-up camera gives you video calls when you need them, and stays tucked away when you do not.

- Height adjustable stand lets each user set the screen to a comfortable position, reducing strain over long shifts.
- Aluminium alloy and steel housing with a Kensington Lock point helps it stand up to busy public-facing environments.
- No WiFi and no operating system means you deploy your own image, your own security policy, and your own network setup, exactly as your IT team wants it.
- Wired gigabit Ethernet keeps the connection steady for point-of-sale, kiosk, and office workloads.

If you are standardising desktops across a branch, a clinic, a showroom, or a factory office, the Uno gives you a dependable, uniform footprint that is quick to roll out and easy to support. Choose the Uno and give your teams a workspace that just gets on with the job.
