Big screen productivity without the big footprint.

Meet the Thinvent® Uno 21.5" All in One PC, built for people who need a dependable workstation that simply gets on with the job. The AMD Ryzen™ 5 7530U processor keeps everyday work moving briskly, so spreadsheets, browsers and business apps open without making you wait.

Why it belongs on your desk

- A generous 21.5 inch full HD display gives you room to spread out documents, dashboards and video calls side by side, with wide viewing angles that keep everything clear from almost anywhere in the room.
- The all in one design means one tidy unit instead of a tower, monitor and tangle of cables, freeing up valuable desk space in busy offices, clinics, classrooms and shop floors.

- Ubuntu Linux 24.04 LTS comes ready to run, giving you a stable, secure foundation for kiosks, point of sale terminals, reception desks and shared workstations.
- Built in WiFi, gigabit Ethernet, dual speakers and a pop up camera mean you can start working, presenting or meeting straight out of the box.
- The aluminium alloy and steel housing is made to stand up to daily use in commercial environments, while the Kensington Lock helps keep your investment where it belongs.

If you want a smart looking, space saving computer that handles real work day after day, the Thinvent Uno is the sensible choice.
