The all-in-one industrial workhorse, built for purpose, not for fuss.

Uncompromising Simplicity for Demanding Environments

Say goodbye to bulky towers and tangled cables. The Thinvent® Uno consolidates everything into one sleek, robust unit, freeing up valuable space on the factory floor, in the warehouse, or at the point of sale. Its dedicated embedded software is streamlined for reliability, launching directly into the applications you need without the bloat or vulnerability of a general-purpose OS. This means less downtime and more uptime.

Engineered for Endurance and Ease

Designed with industrial stamina in mind, this PC thrives where others falter. The fanless, solid-state construction ensures silent, dependable operation day in and day out, impervious to dust and built to withstand the rigours of 24/7 use. The integrated 23.8" display offers clear, crisp visibility for monitoring processes, displaying information, or managing logistics.

Ultimate Control at Your Fingertips

Maintain complete command effortlessly. Remotely manage, update, or troubleshoot the system from any web browser, minimising physical intervention and keeping operations running smoothly. It seamlessly connects to existing networks and peripherals, ready to power digital signage, run kiosk applications, host control panels, or act as a dedicated workstation for specialised software. This is computing, distilled to pure utility.
