The one PC that works as hard as you do.

Simplify your workspace with the Thinvent Uno 23.8-inch All-in-One. This powerful, space-saving machine puts everything you need into a single, elegant screen, cutting cable clutter and freeing up valuable desk space for what really matters.

Built around a 12th Gen Intel Core i5 processor, the Uno delivers responsive performance for everyday business tasks, point-of-sale systems, digital signage, or kiosk applications. Whether you're managing stock, handling customer enquiries, or running office software, this PC handles multiple applications without skipping a beat.

We understand that one size rarely fits all in commercial environments. That's why the Uno comes without an operating system, giving you the freedom to install exactly what your workflow demands. No bloatware, no unnecessary extras, just a clean, reliable platform ready to be tailored to your needs.

Reliability is at the core of its design. The aluminium alloy and steel chassis provide robust protection, while the 12V power supply keeps energy consumption low and heat output minimal. Dual-band Wi-Fi ensures stable, fast connections in busy environments, and the pop-up 2MP camera adds a layer of privacy when needed.

Ideal for retail counters, reception desks, healthcare stations, or industrial control rooms, the Thinvent Uno transforms any desk into a productive command centre. Its fixed stand keeps the screen steady, and the wide viewing angles ensure information is easy to read from any position.

Choose the Thinvent Uno – the all-in-one that brings clarity, efficiency, and simplicity to your daily operations.
