Powerful performance meets elegant simplicity in the Thinvent Uno 23.8" All in One PC.

Built for demanding industrial environments yet designed to look at home anywhere, this all-in-one turns your workspace into a streamlined command centre. The powerful Intel Core i5 processor handles multitasking with ease, from running control software to managing inventory systems – all while saving valuable desk space.

Perfect for factory floors, retail counters, healthcare stations and office reception areas, the Uno brings together responsive computing and a crisp 23.8-inch full HD display. The pop-up camera keeps privacy firmly in your control, while the robust aluminium and steel housing shrugs off the bumps and knocks of daily use.

Why choose Thinvent's Uno over a standard desktop plus monitor?

- One cable to power everything – cleaner setup, fewer headaches
- Fixed stand for stable placement in high-traffic areas
- Windows 11 IoT Enterprise LTSC for long-term reliability without unnecessary updates
- Low-voltage 12V operation means lower energy bills and safer heat output
- Multiple USB ports for barcode scanners, printers or card readers

Whether you're upgrading a legacy system or building a new workstation, the Thinvent Uno delivers industrial-grade dependability in a space-saving, modern package. It's the intelligent choice when you need a computer that works as hard as you do.
