Work smarter, not harder with the Thinvent Uno 23.8" All-in-One PC.

Built for modern workplaces where space is at a premium, this sleek all-in-one combines robust desktop performance with a clean, cable-free setup. The Intel Core i5 processor delivers the power you need for demanding multitasking, data entry, or running business applications without lag. Whether you're managing stock, processing orders, or handling customer records, the Uno keeps your workflow smooth and responsive.

Why choose the Uno over a traditional desktop? It saves desk space, reduces clutter, and connects easily to your existing peripherals. The height-adjustable stand means you can set the screen at the perfect angle for hours of comfortable work – no more neck strain from fixed monitors. And with Ubuntu Linux pre-installed, you get a secure, stable operating system that boots quickly and stays out of your way.

This isn't just a PC; it's a productivity hub for retail counters, reception desks, or office workstations. The 23.8-inch full HD display gives you plenty of screen real estate to view spreadsheets, documents, or multiple windows side by side. Pop-up webcam keeps video calls professional when needed, and built-in speakers handle internal announcements or training videos.

The Thinvent Uno is built to last with a durable aluminium and steel housing, and runs cool and quiet even during long shifts. With easy connectivity via multiple USB ports and gigabit Ethernet, it's ready to plug into your network straight out of the box.

Upgrade your workspace with an all-in-one that combines power, ergonomics, and reliability – the Thinvent Uno.
