Power your operations with industrial-grade simplicity.

Designed for demanding environments where reliability is non-negotiable, the Thinvent Uno 23.8-inch All-in-One PC delivers exactly what your business needs – and nothing it doesn't. By running on Thinux Embedded Linux, you escape the constant updates, licensing costs and security headaches of a general-purpose operating system. Instead, you get a stable, locked-down platform that just works, day after day.

Built around a 12th-generation Intel Core i5 processor with eight cores, this machine handles multi-tasking with ease – whether you're running point-of-sale software, managing a digital signage display, or operating a dedicated kiosk. The 4 GB of RAM and 128 GB solid-state drive provide snappy responsiveness, while the 23.8-inch full HD screen offers clear, wide-angle viewing for operators and customers alike.

Remote management is effortless. With built-in RDP 10, VNC shadowing and browser-based administration, your IT team can support dozens of units from a single console – no need to visit each device. The pop-up 2-megapixel camera adds an extra layer of security for user authentication or video calls, and the height-adjustable stand ensures comfortable ergonomics for any workstation.

Built from aluminium alloy and steel, with a Kensington lock slot, this PC is tough enough for factory floors, retail counters and healthcare settings. Two HDMI and VGA outputs let you extend or mirror displays, while the bundled power supply and 2-metre cable minimise clutter.

When you need a dependable, cost-effective all-in-one that puts control back in your hands – without the distraction of a desktop OS – the Thinvent Uno is the intelligent choice.
