Work smarter, not harder, with the Thinvent Uno 23.8" All-in-One PC.

Ergonomics that work for you

- A height-adjustable stand means you can position the screen exactly where you need it, reducing neck and eye strain during long shifts.
- The slim, all-metal body fits neatly into any workspace – from a busy shop floor to a sleek reception desk.

Built for continuous operation

- Powered by a 12th Gen Intel Core i5 processor, this all-in-one handles multiple applications with ease, from inventory management to digital signage.
- Low-voltage 12V operation keeps energy costs down and heat output minimal, ideal for always-on environments.

Privacy and security built in

- The pop-up 1080p camera stays hidden until you need it – perfect for video calls or customer check-ins, then disappears when not in use.
- A Kensington lock slot lets you physically secure the unit, crucial for public-facing counters.

Simple, flexible deployment

- Ships without an operating system, giving you the freedom to install Windows, Linux, or your own custom OS.
- Plenty of USB ports (six in total) and an HDMI output make connecting peripherals or a second display effortless.

The Thinvent Uno 23.8" is the reliable, stylish, and comfortable choice for retail, healthcare, education, and light industrial workstations.
