A workspace that works as hard as you do.

Why settle for a cramped laptop when you can command your entire operation from a single, elegant screen?

Built for the modern industrial desktop, the Thinvent Uno 23.8-inch All-in-One brings serious processing power to your fingertips. Powered by a 12th-generation Intel Core i5 processor with eight cores, it handles everything from complex data dashboards to multitasking across multiple applications without breaking a sweat. The full HD display offers crisp, wide-angle viewing, so you can share screens with colleagues or monitor production lines from any position.

Space is at a premium on the factory floor, in the control room, or at the reception desk. This sleek, all-in-one design eliminates the tangle of cables and the footprint of a tower, leaving you more room to work. The integrated pop-up camera keeps your video calls professional and secure – it's there when you need it and hidden when you don't.

Pre-installed with Ubuntu Linux, you get a stable, secure, and virus-resistant operating system out of the box. No licensing fees, no bloatware – just a clean, fast environment for your industrial applications. The fixed stand keeps the unit rock-solid, even in busy environments where a knock could send a monitor tipping.

With dual-band WiFi, gigabit Ethernet, and a versatile selection of USB ports, connecting your peripherals and network is effortless. And because it runs on a low-voltage 12V adapter, it sips power while delivering reliable, day-long performance.

Choose the Thinvent Uno for your next workstation refresh. It's the smart, space-saving, no-compromise choice for the modern workplace.
