Power meets elegance in every workspace.

Unmatched performance for demanding tasks

The Uno 23.8-inch All in One PC brings the muscle of a 12th-generation Intel Core i5 processor to your desk. With eight cores and turbo speeds up to 4.4 GHz, it handles data-heavy spreadsheets, simultaneous browser tabs, and business applications without breaking stride. Whether you're managing inventory, processing transactions, or running light design work, this machine keeps productivity flowing all day long.

A workspace that adapts to you

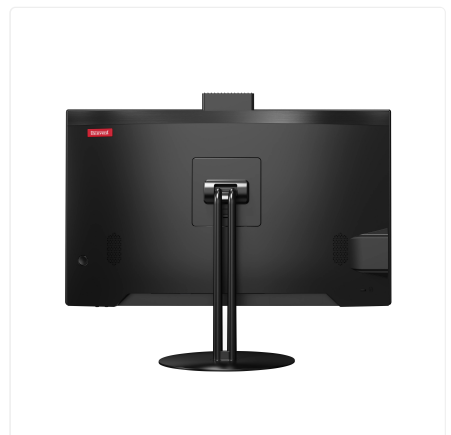

The height-adjustable stand lets you find the perfect ergonomic position, reducing neck and back strain during long shifts. Its slim, aluminium-and-steel chassis takes up barely any desk space, while the 23.8-inch full-HD display delivers crisp, wide-angle views for sharing dashboards or reviewing reports. The pop-up 2-megapixel camera tucks away when not in use, giving you privacy and a clean look – ideal for hot-desking environments or customer-facing counters.

Built for the modern professional

With dual-band WiFi, gigabit Ethernet, and a full set of USB ports, connecting peripherals and networks is effortless. The silent, fanless operation keeps the office quiet, and the 12-volt low-power design saves on energy bills. Pre-loaded with FreeDOS, you can install the operating system and software stack that suits your business – no bloatware, no compromises.

Why choose Thinvent Uno

This all-in-one is engineered for reliability in commercial settings – from hotel check-ins and retail kiosks to classroom workstations. The pop-up camera ensures secure video calls, the adjustable stand fits any user, and the robust build means it withstands 24/7 use. Upgrade your workspace with a clean, powerful, and adaptable solution that grows with your business.
