Power where you need it, simplicity where it counts.

Streamlined performance for the modern workplace

Say goodbye to tangled cables and bulky towers. This Thinvent All-in-One PC puts a powerful 12th generation Intel Core i5 processor behind a crisp 23.8-inch Full HD display, giving you the speed and clarity to handle point-of-sale, inventory management, or customer-facing kiosks without clutter. The pre-installed Windows 11 IoT Enterprise delivers a secure, locked-down experience that stays stable year after year – no unwanted updates, no bloatware, just reliable operation exactly as you configure it.

Built for reliability in demanding environments

Whether your front desk sees constant use or your factory floor faces dust and vibration, this machine is engineered to keep working. The robust aluminium and steel housing protects internal components, while the fixed stand holds firm in high-traffic areas. A pop-up camera adds a layer of privacy for video calls or security check-ins, and dual-band Wi-Fi keeps you connected even in busy wireless environments. Low-voltage 12V power means lower energy bills and safer operation around staff and customers.

The smart choice for business efficiency

Designed for easy deployment and minimal maintenance, every Thunder Uno helps reduce downtime and total cost of ownership. Use it as an all-in-one for reception desks, self-service checkouts, digital signage, or industrial HMIs – it adapts to your workflow, not the other way around. With generous connectivity options and a 2-metre power cable, setup is straightforward. Choose the Thinvent Uno for performance that works as hard as your team does.
