Big-screen productivity, without the big footprint.

The Thinvent Uno all-in-one brings a generous 23.8-inch Full HD display and 13th Gen Intel Core i5 performance together in a single, tidy unit. It is built for people who spend their day in front of a screen and want that screen to keep up with them.

Why the Uno earns its place on your desk

- A wide, bright 23.8-inch Full HD panel with 178-degree viewing angles keeps documents, dashboards and video calls crisp and comfortable, even when you are sharing the screen with a colleague.
- The Intel Core i5-1335U processor with 10 cores responds quickly to everyday workloads, so switching between spreadsheets, browsers and business apps feels effortless rather than frustrating.
- Everything is in one place: display, speakers, webcam and connectivity arrive as a single unit, freeing your desk from a tangle of cables and separate boxes.
- The pop-up 2 megapixel camera stays tucked away when you are not on a call, giving you privacy on your own terms.
- A height adjustable stand lets each user set the screen where their posture is happiest, whether that is for focused work or a shared workstation.
- Windows 11 Professional comes ready to go, with the security and management tools that growing businesses rely on.
- Wired and wireless networking, plus a full spread of USB, HDMI and VGA ports, make it simple to connect monitors, projectors and peripherals without adapters.
- A Kensington lock point helps you protect your investment in shared or public-facing spaces.

The Uno is the sensible choice for offices, clinics, reception desks and training rooms: one dependable machine, one clean desk, and a screen that makes the working day easier.
