Powerful computing, beautifully integrated – your all-in-one workspace.

Built for the modern industrial environment, this 23.8-inch display is more than a screen; it's the heart of your control room. With its height-adjustable stand, you can tilt, swivel, and raise the display to the perfect ergonomic position, reducing strain during long shifts. The robust aluminium and steel chassis shrugs off the bumps and knocks of a busy factory floor, while the pop-up camera keeps your video calls private when needed.

Why choose this Thinvent all-in-one?

- Run demanding HMI, SCADA, and data visualisation applications smoothly with the capable AMD Ryzen 5 processor.
- Enjoy instant, reliable start-up and fast access to your industrial software thanks to the speedy 128GB SSD.

- Connect easily to legacy equipment with the VGA port, or drive a secondary monitor via HDMI for expanded workflow views.
- Stay wire-free with dual-band Wi-Fi, perfect for connecting to network printers, databases, and cloud services without cable clutter.
- Power the entire system from a single, low-voltage 12V adapter – safer for workshop use and easier to install.
- Comes ready to run with Windows 11 IoT Enterprise LTSC, a stable, long-term platform for dedicated industrial applications.

From machine control to quality inspection, from condition monitoring to operator dashboards, the Thinvent Uno brings the power of a desktop PC into a clean, space-saving, and professional all-in-one. Upgrade your workstation today – your operators will thank you.
